PROJECT PERFORMANCE REPORT

Project Title: Padawan IOS App   **Date Prepared:** 10/04/2020

Project Manager: Leon Watkins   **Sponsor:** Professor Garvin

Accomplishments for This Reporting Period:

During this reporting period I accomplished a good deal of foundational work required to complete this project. The project idea was created, accepted, and planned. The name of the project was determined, and the tools that would be utilized for the project were selected. The project based analysis report was completed. The projects GitHub site was created and all project documentation to date has been uploaded to the site. To date three weekly time logs have been completed along with a video presentation explaining the idea and feedback was gathered via a peer review group. I have obtained all of the tools needed to complete this project and become familiar with their operation.

Accomplishments Planned but Not Completed This Reporting Period:

During this reporting period I would have liked to developed some of the app pages and image repository that will be utilized for the app.

Root Cause of Variances:

The cause of the variance was an ambitious project that relied on the project team member to develop skills and utilize tools with which they had no prior experience. This was not anticipated but the time spent building the foundation and developing the skill set did take longer than anticipated and should be monitored for the duration of this project.

PROJECT PERFORMANCE REPORT

Impact to Upcoming Milestones or Project Due Date:

At this time there is no risk to upcoming milestones or a risk of missing the project due date.

Planned Corrective or Preventive Action:

Additional time will be allocated to the project if the need arises along with soliciting assistance from a subject matter expert to assist with advanced technical challenges that may occur if possible.

Root Cause of Variances:

N/A

PROJECT PERFORMANCE REPORT

Summary of Upcoming Tasks

The upcoming project tasks include the development of the basic app pages such as the login screen, home page, profile page, and the learn or teach pages. Along with the basic color scheme, logo, and application page layout.

Planned Corrective or Preventive Action

Make and follow a plan of what tasks need to be completed, that is broken down into small subtasks that can be completed individually, so as not to feel overwhelmed and to gain a sense of progression.

Accomplishments Planned for Next Reporting Period

- Logo created, color scheme determined, and standard page layout determined.
- Basic pages developed
    - Login
    - Home
    - Profile
    - Learn page
    - Teach page

PROJECT PERFORMANCE REPORT

New Risks Identified

Risk
Final application may not have all planned functionality upon project completion date.

Issues

Issue
Team member may not have required skill set required to complete app with all functionality prior to deadline.

Comments

I hope that I haven't bitten off more than I can chew with this project idea, as I wanted to push myself for this project and learn new skills. If I had developed a website or even an app that only displays information would have been a much easier undertaking, as I am concerned about the input, storage, and output of data, but hopefully I can work through this and develop a functioning IOS application at the conclusion of this project as planned.
